1 IN 3 PEOPLE ARE ASYMPTOMATIC – SHOWING NO SIGNS OF HAVING COVID-19. TESTING REGULARLY HELPS STOP THE VIRUS SPREADING

COVID-19 SALIVA RAPID ANTIGEN TEST CASSETTE

- ✓ Identifies the body's response to Coronavirus after the onset of the infection by detecting the presence of COVID-19
- ✓ Easy to administer in any setting, whether in clinic, at home or your workplace environment
- ✓ Helps reduce the spread by asymptomatic people
- ✓ Routine testing allows for peace of mind for you and your family

CHOICE OF TEST

A saliva sample is less invasive than a nasopharyngeal (nose) swab, so it is preferable in some cases to use this type of sample collection. However, this test comes with the option to use a nasopharyngeal (nose) swab if required.

We have been working in partnership with the NHS for over 15 years and are a trusted and award winning supplier of medical products into the NHS. We offer full ongoing support through our dedicated customer support team.
